

22VR 0762026

₹100/day compensation

When an eligible failed transaction is not reversed within the prescribed time.

RBI/2019-20/67 · in force since 15 Oct 2019 · eligibility and the T+1 / T+5 windows depend on the channel — not every failed transaction qualifies. Most customers never know to check.

Vasool Raja checks your statement against the RBI rule that applied on that date.

22 RBI rules implemented · 76 automated tests · ready to demo

Rule-driven. Evidence-backed. Human-confirmed.

It's not one rule. It's a rulebook — versioned, tested, deterministic.

₹100/day is one of about forty RBI rules that decide what your bank may charge, what it must tell you first, and what it owes you when it fails. Your bank knows all of them. You know none.

40 mapped does NOT mean 40 implemented. Each of the 22 implemented rules carries: RBI source / circular · effective date · conditions / formula · required evidence · automated tests. A rule engine, not an LLM guessing what RBI says.

Failed transaction

Reversal by T+1 (UPI) or T+5 (ATM);
₹100/day after, paid without a
complaint

RBI/2019-20/67 · 2019

Minimum balance

Warning notice + one month to restore;
penalty proportionate; never negative

RBI · 20 Nov 2014

ATM charges

5 free own-bank, 3/5 other-bank,
enquiries count; max ₹23 after

RBI · eff. 1 May 2025

Credit-card closure

Closed within 7 working days of
request, else ₹500/day

Card Directions · 2022

Unauthorised transaction

Report within 3 working days → zero
liability; shadow credit in 10 days

RBI · 6 Jul 2017

Loan charges

Nothing outside the Key Fact
Statement; penal charges never
capitalised

RBI · eff. 1 Oct 2024

Inactive accounts

No minimum-balance penalty, no
reactivation charge

RBI · eff. 1 Apr 2024

Bank lockers

Loss by negligence, fire, theft or staff
fraud: up to 100× annual rent

RBI · Aug 2021

Amma's passbook: ₹295 gone. “System charge, ma’am.”

Date	Particulars	Withdrawal	Deposit	Balance
02/06/26	NEFT PENSION JUN		6,500.00	8,214.00
04/06/26	ATM WDL CANARA RS PURAM	3,000.00		5,214.00
11/06/26	ATM WDL SBI GANDHIPURAM	2,000.00		3,214.00
30/06/26	CHRG MIN BAL NON MAINT ?	295.00		2,919.00
30/06/26	SMS ALERT CHRG Q1 ?	17.70		2,901.30

A printed passbook page, June 2026. The two lines she cannot explain.

SHE ASKS

“Why ₹295?”

COUNTER

“System charge, ma’am.” She leaves.

THE RULE

A minimum-balance penalty needs a warning and one month to restore. She got neither.

MONTHS LATER

Her phone rings, in Tamil: “Amma, unga account-la ₹590 thappa cut aagirukku. Kumar-ku sollirukkom.”

HER SON

Gets one message: ₹590 potential claim · the RBI rule · evidence ready · one button. Nothing is filed until he confirms.

People have rights they don’t know they have, and the process to exercise them is too hard.

The rules are hidden knowledge. The statement is hidden evidence. The complaint is a process nobody finishes. Vasool Raja identifies the potential claim and prepares the recovery workflow — an actual financial event checked against the rule that applied to it. Nothing is filed until human confirmation.

Tamil voice + guardian = accessibility layer — same regulatory engine underneath.

₹7,086 crore in penalties last year. 13.34 lakh complaints.

Regulatory-rule violations happen at massive scale, while customers must currently discover and pursue them manually. These are problem-scale figures from public sources — not Vasool Raja results, and not amounts Vasool Raja claims to recover.

₹7,086 cr

minimum-balance penalties collected in FY26 alone

SOURCE Rajya Sabha reply, 28 Jul 2026 — HDFC ₹1,798 cr, Axis ₹1,081 cr

₹35,588 cr

minimum-balance, ATM and SMS charges, FY18–FY23

SOURCE Rajya Sabha reply, 8 Aug 2023

13.34 lakh

complaints to the RBI Ombudsman in FY25

SOURCE RBI Ombudsman Scheme annual report 2024–25

₹59,600

external documented case: awarded on a ₹10,000 ATM failure — ₹100/day for the 296 days until reversal, plus costs

SOURCE Delhi consumer commission, 27 Aug 2026 (ANI) — the customer litigated for four years; not a Vasool Raja recovery

The customer in the ₹59,600 case got what RBI says should have been credited automatically — only because he litigated. Every UPI user in India is exposed to the same rules: 24.51 billion transactions a month (NPCI, Aug 2026).

Existing solutions we evaluated each cover one step.

	Finds the problem for you	Computes what RBI says you're owed	Prepares evidence + complaint	Runs the 30-day clock, escalates	Tamil, voice, family helper
RBI CMS portal cms.rbi.org.in	—	—	—	—	12 languages, web form
NPCI UPI Help status of a UPI transaction	—	—	—	—	—
ClaimBack.in statement scan, draft email	✓	—	draft only	—	—
Bank apps / CRED spend insights, hidden card charges	partly	—	—	—	—
Vasool Raja statement → rule → amount → evidence → priority → complaint → tracking	✓	✓	✓	✓	✓

Existing solutions address individual steps. Vasool Raja connects the complete regulatory-checking chain. END-TO-END REGULATORY CHECKING ENGINE — not AI for the sake of AI. The innovation is the system design: financial state + time-aware regulation + deterministic rules + evidence + action.

DIGITAL TWIN = ACTUAL FINANCIAL STATE ↔ EXPECTED REGULATORY STATE

The account is reconstructed over time and compared with the RBI rule in force on each date. Expected – actual = regulatory delta = potential claim.

ACTUAL FINANCIAL STATE · from the statement

- Transaction failed ATM withdrawal
- Debit ₹1,200 · 3 Aug
- Reversal credited 20 Aug
- Compensation actually credited ₹0**
- Evidence 2 statement lines · ref NFS803110

VS

EXPECTED REGULATORY STATE · rule in force that day

- Rule RBI/2019-20/67
- Effective date 15 Oct 2019
- Deadline T+5 → reversal by 8 Aug
- Expected compensation ₹100 × 12 days late = ₹1,200**
- Credited automatically, no complaint needed

EXPECTED under the rule

₹1,200

MINUS ACTUAL credited

₹0

= REGULATORY DELTA

₹1,200

POTENTIAL CLAIM

₹1,200

Evidence attached · Confidence: confirmed · Complaint prepared · human confirms

SYSTEM ARCHITECTURE AS BUILT · green = deterministic decision path · gold = LLM / OCR explanation path (never decides)

Every potential claim = TRANSACTION + ACCOUNT STATE + APPLICABLE RULE + EFFECTIVE DATE + CALCULATION + EVIDENCE. Without all six: no claim. Versioned deterministic RBI rules decide; the LLM only extracts, explains and communicates.

Stateful: adding an earlier statement changes the reconstructed account state, and can change a verdict (slide 8). GUARDIAN (காப்பாளர்) — accessibility, not the engine: holder called first in Tamil; one trusted person, one button; no complaint is filed without human confirmation.

LLM $\neq$ DECISION MAKER

DETERMINISTIC RULE ENGINE = DECISION MAKER

The LLM extracts, explains and communicates. It cannot create a claim.

1

“Isn’t this just ChatGPT?”

An LLM has no authoritative account state, no rule execution, no effective-date logic and no deterministic claim calculation. Vasool Raja supplies all four.

2

“What if the LLM hallucinates?”

It does not determine the claim; the deterministic rule engine does. Every finding requires transaction data + account state + effective-date rule + calculation + evidence.

3

“What if a rule changes?”

Rules are versioned by effective date. The engine applies the rule that was in force when the transaction occurred (e.g. ATM cap ₹21 before 1 May 2025, ₹23 after).

4

“What if evidence is incomplete?”

Do not claim. The finding is labelled “unclear” and the system asks for the missing information — it never presents an unclear finding as a claim.

NOT A PLAN. A WORKING ENGINE.

COMPLAINT TO THE BANK

To

The Grievance Redressal Officer / Branch Manager CANARA, Bangalore

From

Shri A. Vasool Raja

Date

17 Aug 2026

Subject

Reversal — amount pending 447 — request for credit of ₹3,800.00 under RBI direction (RBI-TAT-2019-UPI)

Dear Sir/Madam,

I am writing under the Bank's stated grievance redressal policy and the Reserve Bank of India's customer protection directive regarding the following system in my account statement. For each entry I state the RBI directive that applied on that date, when the directive requires, when my statement shows and the amount involved.

1. Failed ATM withdrawal not reversed within T+6 — ₹1,200.00 compensation 100% for 100% 2026

2. Late ATM reversal — ₹2,600.00 compensation 100% for 100% 2026

3. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

4. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

5. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

6. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

7. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

8. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

9. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

10. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

11. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

12. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

13. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

14. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

15. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

16. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

17. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

18. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

19. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

20. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

21. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

22. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

23. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

24. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

25. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

26. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

27. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

28. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

29. Late UPI reversal — ₹500.00 compensation 100% for 100% 2026

HONEST LIMITATION

Recovery is currently simulated. The prototype identifies potential claims and prepares the recovery workflow. It does not email a bank. No actual bank recovery has been demonstrated.

On 25 September you will see this journey live.

A · LIVE DEMO — every demonstrated step already works

Recovery is simulated. Nothing is emailed to a bank. No complaint without human confirmation. We say this before anyone asks.

B · BUSINESS MODEL — ONE ENGINE. TWO SIDES.

Why a bank could have an incentive: earlier detection → earlier resolution → fewer escalations, under RBI's Internal Ombudsman Directions (14 Jan 2026, auto-escalation of unresolved complaints). No bank is a customer today.

Bank rule theriyadhaa? Vasool Raja paathukkum.
